

SURESH T

AI-Augmented Engineer / Full Stack Software Engineer

Chennai, India | +91 9080236848 | suresh140105@gmail.com | <https://www.linkedin.com/in/suresh-t/> | <https://sureshportfolio-suresh-t-14s-projects.vercel.app/>

PROFESSIONAL SUMMARY

AI-Augmented Full Stack Software Engineer with hands-on experience building intelligent web applications using Java, Spring Boot, React.js, Node.js, and Python. Experienced in integrating Google Gemini APIs, prompt engineering, and AI-assisted development workflows into production features across three internships and multiple full-stack projects. Regularly use GitHub Copilot and VS Code AI extensions to accelerate development, improve code quality, and speed up debugging and documentation. Delivered AI-powered platforms, booking systems, and student management systems with RESTful APIs, JWT-based security, CI/CD pipelines, and AWS/Firebase deployments, collaborating in Agile teams to own features end-to-end.

AI DEVELOPMENT EXPERTISE

- **Prompt Engineering:** Designed structured prompt templates for LLM-powered features (Gemini), improving response consistency and reducing hallucinations
- **Retrieval-Augmented Generation (RAG):** Built a RAG layer using embeddings to ground AI responses in user-specific context and data
- **AI API Integration:** Integrated Google Gemini API for real-time conversational and multi-modal AI features
- **AI-Assisted Development:** Use GitHub Copilot and VS Code AI extensions for code completion, debugging, and documentation
- **AI-Assisted Workflow:** Apply AI tools for backend architecture ideation, API design, and code review support alongside standard engineering practice

WORK EXPERIENCE

Web Stack Academy

Sep 2025 - Nov 2025

MERN Stack Developer Intern

Bangalore

- Built and deployed a full-stack AI-powered financial mentoring web application using MongoDB, Express.js, React.js, and Node.js, integrating AI-driven recommendation models with TensorFlow.js, reducing manual financial planning effort by 60%.
- Designed and integrated RESTful APIs with Node.js and Express.js, enabling seamless communication between frontend and backend services.
- Implemented user authentication and role-based access control using JWT, improving application security and user management.
- Collaborated in an Agile development environment, participating in daily standups, sprint planning, and performing code reviews via GitHub, and set up CI/CD pipelines with GitHub Actions for automated testing and deployment.

8Queens Software Technologies

Jun 2025 - Sep 2025

Web Development Intern

Chennai

- Developed a full-stack BookMyShow clone using React.js, Node.js, HTML5, CSS3, and JavaScript, supporting end-to-end ticket booking functionality with Stripe payment integration.
- Enhanced application UI/UX using Figma prototypes, improving user engagement and reducing bounce rate by 25%.
- Implemented responsive web design ensuring cross-browser compatibility across Chrome, Firefox, and Safari.
- Optimised frontend performance by implementing lazy loading and code splitting, reducing initial page load time by 30%, and set up CI/CD pipelines for automated deployment.

Vaishnav Technologies

Apr 2025 - Jul 2025

Full Stack Java Developer Intern

Telangana

- Developed a Student Management System using Java, Spring Boot, MySQL, HTML5, and CSS3, managing records for 500+ students with CRUD operations.
- Designed and implemented RESTful APIs using Spring Boot MVC architecture, enabling secure data exchange between client and server.
- Integrated JWT authentication and JDBC for secure database connectivity, achieving zero security vulnerabilities in production.
- Configured CI/CD pipelines using GitHub Actions for automated testing and deployment, reducing release cycle time by 40%.

PROJECTS

AI-Based Money Mentor - Full Stack Web Application

Oct 2025 - Dec 2025

- Developed a full-stack AI-powered financial advisory platform using React.js, Node.js, Express.js, and MongoDB, serving personalised budgeting and investment recommendations.

- Integrated Google Gemini API with structured prompt engineering for context-aware conversational financial guidance, processing 100+ concurrent user queries.
- Implemented a Retrieval-Augmented Generation (RAG) layer using embeddings to enhance AI responses with context from user financial data.
- Designed a microservices backend using Django REST Framework with secure RESTful API communication and token-based authentication, and real-time data sync via Web-Sockets.
- Managed the full project lifecycle, setting up CI/CD pipelines with GitHub Actions and Docker-based container deployments.
- Tech Stack: JavaScript, React.js, Node.js, Express.js, MongoDB, MySQL, Python, Django, GitHub Actions, Docker

Access AI Bot - Multi-Modal AI Assistant Platform

Jan 2025 - Apr 2025

- Architected an accessibility-focused multi-modal AI assistant using React.js, Node.js, and Python microservices, supporting gesture, voice, and text-based interactions.
- Implemented real-time hand gesture recognition using TensorFlow.js and MediaPipe, achieving 95% gesture detection accuracy for touchless interaction.
- Integrated Google Gemini API for natural language conversational AI, Firebase for real-time database, and MongoDB for scalable user data management.
- Built secure multi-factor authentication (MFA) with Email OTP and Google OAuth 2.0 using Firebase Authentication.
- Built image and gesture processing modules using Python and OpenCV for real-time visual recognition at 30 FPS, deployed on a cloud-native backend with REST APIs and WebSocket connections.
- Tech Stack: React.js, Node.js, Python, TensorFlow.js, MediaPipe, OpenCV, Firebase, MongoDB, Google Gemini API, Tailwind CSS

Student Management System - Java Full Stack Web Application

Jun 2025 - Sep 2025

- Built a role-based Student Management System in Java and Spring Boot with separate dashboards for Admin, Faculty, and Students, managing 500+ student records.
- Implemented a secure login system with JWT authentication, role-based access control, and session management.
- Developed CRUD operations for student registration, attendance tracking, and marks management using MySQL and JDBC.
- Set up a CI/CD pipeline using GitHub Actions enabling automated unit testing and continuous deployment.
- Tech Stack: Java, Spring Boot, MySQL, HTML5, CSS3, JavaScript, GitHub Actions

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (ES6+), Python, SQL, C
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Backend:** Node.js, Express.js, Spring Boot, RESTful APIs
- **Databases:** MySQL, MongoDB, Firebase Realtime Database, JDBC
- **Generative AI:** Google Gemini API, Prompt Engineering, LLM Integration
- **AI Development Tools:** GitHub Copilot, VS Code AI Extensions, AI-Assisted Debugging & Documentation
- **AI / ML Frameworks:** TensorFlow.js, MediaPipe, OpenCV
- **Cloud & DevOps:** AWS (EC2, S3), GitHub Actions, CI/CD Pipelines, Docker, Version Control
- **Tools & Methodologies:** Figma, Postman, Agile, Selenium WebDriver

EDUCATION

Velammal Institute of Technology - Bachelor of Engineering, Computer Science & Engineering	2022 - 2026
<i>CGPA: 8.12 / 10.0</i>	<i>Chennai, Tamil Nadu</i>
St. Joseph Hr Secondary School - Senior Secondary (XII), State Board Tamil Nadu	2022
Vivekananda Vidyalaya Jr College - Secondary (X), CBSE	2020

CERTIFICATIONS & TRAINING

- Selenium WebDriver with Java & Frameworks - Udemy
- GitHub Actions - LinkedIn Learning
- SQL Advanced - Great Learning
- Cloud Computing - NPTEL (IIT)
